

# Mykyta Yaremenko

Fullstack / Frontend Developer (React/Next)

[@ mr.yaremenko.web@gmail.com](mailto:mr.yaremenko.web@gmail.com) | [yaremenko.site](https://yaremenko.site) | [linkedin](#) | [telegram](#)

## Stack

React, TypeScript, Next.js, Node.js, React Query, Redux Toolkit, MobX, Jest, Webpack, AWS, Grafana, TailwindCSS, Zustand, GraphQL, Docker, Motion, Google Analytics, Facebook Pixel, PostgreSQL, Playwright, Vite, Sentry, Nexus.js, Lighthouse, Centrifuge, Zod

To learn more about the challenges I’ve encountered, you’re welcome to check out [my website](#), where I share them in greater detail

## Experience

**Amo** August 2024 - till now

Lead Frontend Developer

<https://amo.tech/>

- Significant changes of a lot of processes: from sprint ceremonies to cross-team ownership
- Centralized self-hosted payment service
- Client-side A/B testing framework
- No-code marketing flow builder
- Next.js App Router migration
- Playwright-based E2E health checks
- Grafana Faro RUM observability
- AI-driven interactive features
- Global GDPR/CCPA compliance engine
- Cloud i18n on AWS S3
- Proactive Sentry monitoring, lower MTTR

**united.tech** March 2023 - August 2024

Front-End Developer

<https://unitedtech.ai/>

- conducted 100+ interviews with Front-end developers
- transferred a project with 20 mirrors and a multi-entry structure from CRA + rewired to Vite
- develop interactive games for contests
- implement feature-toggling
- implement payment cascade
- rewrote CRM from yii2 on Next.js 14
- implement GrowthBook
- implement thematic events, holiday themes

**Woolf** May 2022 – February 2023

Fullstack developer

<https://woolf.university/>

- transition from NodeJS to Fastify/NexusJS
- transition from Fela to MUI; SWC tree shaking optimization
- implement SSE instead webhooks
- transition from Recoil to contexts and React Query
- optimize queries with GraphQL
- create SDK and DOM widgets for third-party platforms
- optimize HLS and big assets

**Qwerty Software** March 2019 – February 2022

Team lead

<https://qwerty.software/>

Headed one of two teams (iOS/Android, fullstack developers and content managers):

- rewrote the platform from Vue/Next.js on Node/React
- implemented React 18 features (suspense, etc), RTK Query on frontend; Sentry, Prisma ORM on backend
- setup CI/CD
- developed algorithms for A/B
- test covering with jest/chai + moch
- saved colleagues’ nerve cells by putting microservices on the shoulders of AWS and Firebase

**ALL Studio IT** April 2018 – March 2019

Frontend developer

- under the direction of the team leader, refactored about a third of the legacy code from AngularJS to React, the rest was on class components and was also rewritten
- implemented emotion and chakra-UI instead of PostCSS
- completed the transition from Flow to TypeScript
- initiated the transition to Trunk-based-development
- worked with motion graphics, creating complex animated elements
- implemented React Cosmos

## What I want

I prioritize:

- Process over Heroism:** I believe in building reliable systems, not relying on overtime and individual heroism
- Empowerment over Liability:** I seek a role where my scope of influence equals my scope of responsibility
- Respect for Boundaries over Manipulation:** I separate professional dedication from personal identity, refusing to normalize toxicity under the guise of "responsibility"
- Aligned Expectations over Paradoxal Demands:** KPIs and processess must align with business behavior; teams shouldn't be penalized for metrics that stakeholders actively disregard;

## Other enginner stuff in my life :)

A few years ago my friend and I launched a startup, shortly before the full-scale war we implemented some ideas, the developments of which is now being used in the Special Operations Forces project. Also, I like pentesting and studying vulnerabilities of systems

## Certifications

**English Certificate 74/100 (C2 Proficient)** June 2024

EF SET

<https://cert.efset.org/X5KMx6>

**Advanced React** January 2024
